

the range of coolers

# BOX

HOME - OFFICE - HOSPITALITY

All Blupura undercounter solutions:  
the power to suit all needs.

  
**blupura**  
*Cool, yes we are.*

# BOX

The undercounter version with a continuous supply capacity of 6, 12, 18, 45, 80 and 150 litres! Also available with Natural gas.

## Natural refrigerant gases

With totally natural refrigerants (HC) such as R290. An ecological choice, with the added advantage of a more silent compressor and ensuring a longer life to the entire refrigerant apparatus.

The Blupura BOX is an understated, functional presence within the units of any kitchen or in the coffee-break area of any office.

Can be used with any type of tap

# BLUSODA BOX

The same compact size and performance as BluSoda is also available in the undercounter version, which can be housed discreetly and practically inside either a kitchen cupboard or office cabinet. A smart, space-saving solution where only the delivery point is visible, leaving you the freedom to choose the most suitable supply tap to suit your environment.

This is an innovative direct cooling technology with the serpentine water coils (stainless steel) and the refrigerant gas coils (copper) housed within a single aluminium cast. The dry cooling system guarantees reduced dimensions but with professional cooling performance, perfect for the needs of home and office consumption.

This is the most high-end professional cooling technology, which is necessary in all those hospitality industry situations in which the highest levels of performance are essential. These levels are reliably achieved thanks to the immersion of the water coils and the refrigerant gas coils into an ice bank.

## Accessories

8  
lt/h

### The new **HOT** version

8 litres of hot water, in the 60, 45 and 30 lt. undercounter versions (BluSoda Box). The first watercooler for office use which also provides hot water at the perfect temperature (95°C) for a good cup of tea.

## Conveyor

Watercoolers generate heat when in operation, this is a fact. But the Blupura conveyor collects and expels hot air through a single aperture in the watercooler housing, which is then repeated at the base of the cupboard or cabinet that houses the Box. Simple but effective heat dissipation together with great space saving.

## Active carbon filters

Purifies the water making it crystal clear, odorless and tasteless. It filters out all impurities up to 0.5 microns, removes all odors and unwanted tastes such as chlorine, asbestos fibers and some microorganisms such as Cryptosporidium.

## Python with recirculation pump\*

\*Standard for BOX 280.  
Optional for BOX 80, BOX 150.

## Sanitizing products

Sanitizing and cleaning products for the plants.

## Pressure reducers

CO<sub>2</sub> pressure reducer for refillable or single-use cylinder, water block, water pressure reducer.

## CO<sub>2</sub> Cylinder

Rechargeable  
0,640 Kg.

## UV filtration in line (12W)

In line UV light.

Certifications (see official listing):

Associations:

The quality of our water-coolers has been certified and awarded by the most important international certification bodies in the sector. A further guarantee for those who buy them and those who use them, and a source of pride for us as we reach for maximum results by focusing on **avant-garde technology, design and ecology.**
